

ADEEL HASAN YOUSFI

QA Automation | Manual Testing | Software Quality Assurance

Karachi, Pakistan | adeelyousfi97@gmail.com

linkedin.com/in/adeelyousfi | github.com/adeelyousfi | **Portfolio:** github.com/adeelyousfi/Software-Automation-Suite

PROFESSIONAL SUMMARY

Final-semester Computer Science student with a strong foundation in **test automation**, **REST API testing**, and **CI/CD**. Self-taught **Playwright**, **Cypress**, and **Postman** through hands-on portfolio projects. Built a unified automation suite using Page Object Model and GitHub Actions. Experienced in **Agile/Scrum** environments, regression testing, and defect lifecycle management. Seeking a QA Automation internship to contribute to software quality and grow as an automation engineer.

TECHNICAL SKILLS

Testing & Automation: Playwright (E2E), Cypress (E2E), Manual Testing, Cross-browser Testing, Page Object Model (POM), CI/CD (GitHub Actions)

QA Methodologies: SDLC, STLC, Agile/Scrum, Regression Testing, Smoke Testing, Functional Testing, Defect Lifecycle, Test Case Design, Test Planning

API & Tools: REST API Testing, Postman (CRUD, Schema Validation, Status Codes), Git, GitHub, VS Code, Power BI, Linux/Command Line

Bug Tracking & Test Management: JIRA, GitHub Issues, Bug Reporting, Test Documentation

Programming: JavaScript, Python, SQL, HTML5, CSS3

QA AUTOMATION PORTFOLIO & EXPERIENCE

Unified Automation Suite (Self-Directed) | Playwright + Cypress + Postman

Playwright | Cypress | JavaScript | POM | Postman | GitHub Actions | 2025 – Present

GitHub: github.com/adeelyousfi/Software-Automation-Suite

- **Playwright:** Built 8+ automated E2E test cases covering login (valid/invalid/empty), cart (add/remove), and checkout workflows with POM architecture and GitHub Actions CI/CD.
- **Cypress:** Developed parallel test suite with 4 page objects (LoginPage, CartPage, ProductPage, CheckoutPage) and data-driven testing using fixture files (userData.json).
- **API Testing (Postman):** Created collection covering CRUD operations (GET, POST, PUT, DELETE) on ReqRes API with schema validation and status code assertions.
- **Cross-browser Testing:** Executed full regression suite on Chrome, Firefox, and WebKit for both Playwright and Cypress.
- **Defect Management:** Documented 10+ defects in SauceDemo test suite with reproduction steps, severity classification, and expected vs actual results using GitHub Issues.
- **Impact:** Reduced estimated manual regression effort by ~40% through reusable automation framework design.

OTHER PROJECTS

SpamShield AI – Email Spam Classifier

Flask, Scikit-learn, MongoDB, Postman | 2025

GitHub: github.com/adeelyousfi/SpamShield-AI

- Built ML web app with 98.9% spam detection accuracy (TF-IDF + SVM); deployed REST API endpoints tested via Postman (status codes, response schema validation).
- Integrated MongoDB for storing prediction history; demonstrated full SDLC from development through testing and deployment.

Travel Destination Analysis

Python, Pandas, Scikit-learn, Power BI, Web Scraping | 2025

GitHub: github.com/adeelyousfi/Travel-Destination-Analysis

- Automated hotel data collection from Booking.com using Python (Requests, BeautifulSoup); cleaned and validated dataset for analysis.

- Applied Linear Regression to identify pricing trends; built interactive Power BI dashboard with maps, bar charts, and dynamic filters.

AI Review Detector – Pharmaceutical Review Classifier (Final Year Project)

Python, Scikit-learn, NLTK, Flask, MongoDB, NLP | 2025 – 2026

- Built multi-class classifier (Positive/Negative/Neutral) to detect AI-generated vs human-written pharmaceutical reviews using TF-IDF and 6 ML models (Logistic Regression, Naive Bayes, Random Forest, SVM, KNN, Decision Tree).
- Performed data cleaning, text preprocessing, feature extraction, and comparative model evaluation (accuracy, precision, recall, F1 score).
- Integrated best-performing model into Flask web app with MongoDB; conducted full testing, validation, and documentation with aim to publish research paper.

EDUCATION

Bachelor of Science in Computer Science

SZABIST, Karachi, Pakistan | Final Semester (Expected Graduation: September 2026)

- Relevant Coursework: Software Engineering, Database Systems, Web Development, Data Structures, Data Science.
- Participated and qualified in University Tech Fest "Zab-e-Fest" (AI, Quality Assurance & Computer Networks modules).

CERTIFICATIONS

- **Diploma in Web Development & Web Engineering** – NAVTTC, Govt of Pakistan (2022).
- **Diploma in Android Development** – MAJU (2023).
- **AI Essentials & Prompt Engineering** – Google (2025).
- **Web Development Workshop** – Out2Sol (2022).

LANGUAGES

- **English** – Professional working proficiency.
- **Urdu** – Native speaker.
